I finally got through by phone to **Bali Furnish** :)  
They say the tallest they make the palm planters is 200cm. THIS is equivalent to 6.56 Feet.  
Cost is \$155.00 per pot. I asked him for a special price but he said no sorry we give you good price already. For shipment he wants me to deal directly with external shippers. He has given me a name.

I have also been in touch with **Ex Bali** a couple of days ago. They also make the pots up to 200cm/5.56 feet. Their price is \$145 per pot with a natural finish. They never answer the phone but are very quick to respond to email. I have emailed them regarding stock and whether they would do the shipping organization for us. From what I read on the website it seems so.

Here are pictures from both websites
