Hey Leslie, hope you are well. Never heard from Jeffrey. Here is our portfolio. We were +2.9 percent last week and another 2 this week. I expect to average 1-2 percent per week for the next few years. Please tell him to call me. He seemed very positive when we met. If he's too busy he should let me know. I'm sure he can use an extra few hundred million.

Updated for Friday's close. +2.9% for the week.

To correlate with 97-99 and 03-06 periods, could you list a few of the key common features of the market today with 97-99 and 03-06? Also, what is different today and what does that mean for potential returns.

EK

In the powerpoint and the intr letter. We should highlight the stage of the economic recovery, the FOMC, and the latter part of the bull market and correlate it to the 97-99 time frame +1000 percent and 03-06. 420 percent. Send me the portfolio with the weekly performance. Should have been up nicely.
