Subject: hope you had a good trip.

The key component is to first keep you healthy and then share with you the right questions . The questions are the difficult part. The answers to many will take more time. The answers are never perfect , they each carry a benefit and a burden. ie. majority rule, in some instances, independence in others, dealing with extraordinary events. both good and bad . Inter and Intra family squabbles. ie. Nadine etc . Operations, successors, values and their transmission. The children need to understand what the family's identified mission is. With that known maybe they should be given the opportunity to practice their roles for the future. start with philanthropy. - later on the family business and other ventures at a more minor level than they will need to have on yours and benjamins death. **Philanthropic endeavors provide teaching**, enabling them to have opportunities and responsibilities, even at young ages. AS the holidays approach , we might think of using some of the all together family time for open discusiion. even the video that i mentioned. re legalities. The structures are complex and will take more time. having a three year plan for the bank is easy compared to the family issues. My financial hippacratc oath is to first --do no harm. Talk to you soon. I might be coming for a few days to europe in november.
