Yes

Sorry for typos

Jeffery,

We have a cockpit glare shield mounted Camera that displays in the Cabin for you on the GIV, Different system than IN-FerRED camera that displays on Cockpit DU885 install.

The camera was operating intermittent during test's at this time, so I decided to send for overhaul. Since this is original Camera installed in 1989, there are no parts available for this unit due to age.

to install new Camera Box that works in conjunction with your SOURCE Selection button at your VIP selector panel, price to install overhauled upgraded Box is \$11,068.75

Not sure if you are interested in having a fwd view displayed on your Monitor in cabin, ?

Do you approve of this repair?

Larry

The cockpit camera box that was identified as inop was sent for repair and evaluation - I received the following from the manufacturer -

"Camera box is beyond repair due to the fact of it's age and parts available. We do have a new/ex unit P/N AVS460. It would take a day to prepare before it ships if that's the route you want to take."

The cost will be \$11,068.75

Please let me know if you want to proceed.
