Good evening Jeffrey,

Larry let me know that you showed concern regarding the ledge detail / overlay.

The new detail is very, very close to that of the table and coordinates exceptionally well.

As a matter of fact, we made the first one out of aluminum and I did not like the inboard radius over the leather, so I had my guys order brass to get a nice, tight fit.

The pieces came out perfect and we were able to send them out today Fed Ex to the metal plater to be plated in the polished finish.

I really like the way they look and aesthetically tie into the table detail from the Rolls Royce.

Overall, the design and effort has made this a great design detail instead of what could have ended up being just a band aid fix.

I believe you will be very happy with this interesting design detail and how it plays throughout the cabin.
