Hi Kaz,

I recently met Sultan who is the founder of Dubai's logistics empire who is the founder of Dubai Ports, the JAFZA among many other things and is known as the man who built the modern Dubai. He's also one of the most energetic and entrepreneurial people I've ever met. He worked very closely with Sony to set up Sony's presence in Dubai and continues to be very connected to Sony using exclusively Sony televisions in his hotels. He was connected to previous senior management of Sony, but he said he didn't know you so I thought I'd connect you.

It looks like he is going to be in Tokyo in December so if your schedule's work, I think you'd enjoy meeting him.
