Subject: Cactus Removal

Jeffrey

this morning we rigged up a large drag using chain and 2 x 30ft railway irons behind the volvo backhoe.

This unit demolished any small cactus and pulled larger plants from the ground.

Proposed making another drag for JD tractor and when the cactus is dormant (late October) proceed with pulling Cactus.

We will also use a skid steer to pile cactus for burning

Would recommend instead of purchasing a bull dozer, we move forward with a new/used skid steer with cab and snow plough attachment

Any bull dozer work, we rent one

do you approve?

regards
