Jeffrey

the pump on Well K will need to be pulled next week
As of yesterday morning the pump kept tripping the circuit breaker
RMC electric with remote assistant from HGS confirmed it is the well pump
BGW (Casey Cook) reviewed transducer records on the 12th, pumping ratio's
and well water levels are ok,

the pump may have sustained damage from a lightning strike at the well head,
damaged earlier in the year from muddy water or it just could be a bad pump.
the only way to find out is to pull the pump.
HGS are on schedule to pull the pump Thursday 20th.

I will confirm cost, if any on Monday
