Subject: results and update

Hi Jeffrey,

Results fluctuated dramatically over the last 10 days because I changed website tags etc. National results match the national.

--4 websites are now staying on the 1st page. (foundation, NY, USVI, Science)
-- 2 neg listings (NY & Huffington)

I expect 1 neg listing to disappear after a few days. So we are left with Huffington.

- There are 3 websites on the 2nd page. I'm working to get these onto the 1st. (education, Intl. and Org).

This last month:

- set up 21 foundation profile accounts onto directories.
- set up a new website page: <http://www.jeffreyepstein.us/>
- revised all the tags, robots, html code for all 9 websites.
- 3 press articles
- prepping a list of exchange link programs for the websites.

pending:

2nd wiki article-- waiting approval.

press article for National Review Online.

foundation center-- trying to get in without the 990 tax form.
