Subject: RE: Zorro Exhaust Fan

Rich Kahn on the Friday May 3rd conference call with Brice Gordon in order to move forward we discussed having the engineering company Beaudin Ganze look at the pool room engineering at Zorro and check the air balance of the pool room pool pack system .We also discussed in order to install a Exhaust fan system in the pool area we need to know what the pool pack unit is putting out with CFM of air flow and we also discussed there is an existing problem with the air flow above the room in the duct work that feeds the upper diffusers above the pool causing the pool pack to not function properly. You said you reviewed the proposal from B&G and did not like the way the proposal was written by the engineer .Brice said he would have the engineer re write and the proposal and re send to you for approval .On May 8th I received the re written B&G proposal from Brice Gordon and it was also addressed to you .In order to move forward with the installation of the Exhaust system we need the engineering Proposal approved so we can have the proper equipment specified for the installation . Thanks Richard Barnett
