**Subject:** just called

Both your cell and a house.

I am starting a board mtg soon – so will not be able to talk for 5h

Just few things when we talk.

- 1) Connected Joe Pagano to specilists. They organized someone that has a lot of experience to see his son in LA. After that he would be reffered further if needed.
- 2) Got some info re coding – there are some interesting works re deciphering neural signals – which seems to be same for all of the sensory inputs. The implication of that is that I fyou can break a code you can circumvent sensory organs (eyes, ears, etc) and deliver appropriate message. Also you can read the signal. Some of interesting work re decoding visual stimuli I happening at Columbia in NYC.
- 3) Mel is losing it but you already know it
- 4) Still waiting re the house – it will be either tmr or Saturday. I will be super disappointed if negative
- 5) We need to discuss Paris – it will be fun
- 6) Few more things... and of course – you are missed ;)

Talk soon

B
