Good morning Jeffrey,

We are fully underway on your aircraft, but there are still items that need to be identified that require your input:

1. Aft lavatory faucet (single pole)
2. The existing 18" towel bar is plated and non descript - is this something you want to replace or leave as is?
3. We need to select yarn colors for the carpet
4. We need to identify carpet pattern (pattern for the floor area only - heat ducts and seat bases in the plain field color)
5. The entry weather curtain is ultraleather now - can we go back with the same white ultraleather as the lavatory bulkheads?
6. We need to select a color for the grospoint that will line the interior of the aft lavatory closet. Do you want to go with an off white to match the leather and bulkheads or something close to the color of the wood veneer? Normally I would not recommend the off white, but this is your personal closet, so it is an option.
7. Seat foam build up approval -
8. After much thought about what you said in our meeting, I would like to investigate taking the divan that you love out of your GII and using it for the GIV. Buying the new divan for the GII. It may sound a bit backwards, but you made it very clear that you love the divan in the GII, so if we can use that one, it will insure your overall happiness. I have asked [REDACTED] to get me the manufacturer and part number from that divan. If you are in agreement, can you live without a divan in the GII for a relatively short period of time?

Eric
