Jeffrey,
photo below is L/H fwd bulkhead, maybe locate 6x9 speakers in this bulkhead left and right side fwd bulkheads and Foie (Foe) Paint the speaker grill or a fabric to match the wood for front speaker imaging and clarity?
also below lower photo shows current speaker location between the window frames at EAR level, since you are utilizing a fabric on these panels we should get good sound clarity from speakers if we also install new 6x9 speakers in these locations. the main sound clarity will come from fwd speakers and good fill sound would be provided from speakers in side panels. maybe?

thx.,
