Good Morning Mr. Epstein the problem with this installation as we found out when the french painter did the bathroom ceiling is to give the painter a flat work surface to reach around the entire room to paint a mural like a painting requires a truck load of wood planks to make a flat dance floor structure below the ceiling .This kind of installation requires the long pipe jacks scaffold with truss connections to span across the room and the wood structure built above. The amount of material and labor is extensive also the proper protection needs to be installed due to this being a finished residence ,To do the bathroom ceiling we had to hoist the material into the bathroom with a crane on the street through the sitting room windows. To purchase the necessary scaffold material to make a flat floor structure for a artist to work above for the bathroom ceiling or dinning room and make it safe for them to work and to store some where would be an enormous undertaking .
