Why And How They Work!

The penis consists of three chambers: Two on top and one on the bottom. The two top ones make up the erectile tissues and the bottom chamber is used for urination and ejaculation.

When you are sexually aroused the brain starts to release a hormone. The penis is then filled with blood which causes the bottom chamber to expand. The cells are then filled with blood which causes the penis to erect.

Dr. MaxMan increases the capacity limit of the Corpora Cavernosa which allows more blood to enter the cavern creating a much longer and thicker erection.

Dr. MaxMan is known to increase the frequency of cell growth within the corpora cavernosa itself. An Once the cell account increases, this allows for more blood to enter the penis which results in a

much larger and longer erection. The corpora cavernosa are the two bodies of erectile tissue on each side of the penis. DrMaxMan has no known side effects. All growth is permanent.

About Us and Our Penis Enlargement Pills

Dr. MaxMan is the breakthrough herbal formula created by a team of urologists, led by Dr George Acuiar. After many hours of research, discovery and testing, an all natural potent herbal formula was discovered, which was later named Dr MaxMan.

With thousands of satisfied client testimonials, our team at Dr MaxMan has proven that a 100% herbal, 100% safe formula can increase your penis size. There is no need for painful mechanical extenders, or exercises.

Before

Since using your product, my penis has increased in size, but my sex life is better than ever before. I no longer have to worry if my partner is satisfied or not. My penis is longer and wider, but with a confidence I feel like a new man. What I ask myself now.

I was a sceptic, that was for sure, but with a 100% guarantee I had nothing to lose. Unbelievably, the product worked! I can't believe I didn't hear of this from other men, but I'm guessing that's why they let the competition in on it. I want every man to have an answer to changing your life, or your girlfriend will know the difference.

With Dr MaxMan's help, you can achieve all the gains in length and thickness that you've always dreamed of, in an amazingly short time.

Psychological Benefits of a Bigger Penis

These days, we all know that bigger is better. This is not limited to cars, houses, or, you guessed it, penis size. In fact, whether the size of a man's penis makes a big difference to the girls in our lives.

One of the responsibilities in a relationship is to satisfy your partner. We all know that this cannot be done to your fullest potential without a bigger penis. No one wants to be a size 4 when guys know the difference. When you offer, you can just tell them something is missing. They may have made a joke, but it leads to continuous thoughts of what if.

We all know that the first thing a woman notices about a man is his penis size, and it's impossible to deny that manhood measures a lot more than just size.

On the flip side of the coin, a man who walks confidently with swagger in his step and knows that the next chick he talks to will be in his apartment, tends to approach life from a different angle. Instead of looking to the ground when he says something, he has a direct gaze straight in the eye and saying what's on his mind.

A big penis has tons of benefits. When we say big we don't mean 13 inches. You better be charging by the hour on your night. The truth is, if you are at 4 inches, there's no reason why you can't be 8 or even a 9. With the right supplements, your penis can grow and without pain!

With guys, one of the most common contributing factors to anxiety, depression and emotional disorders is small penises. You may not realize this is a well known fact among most doctors and ED specialists. With that said, there is treatment for this, and Dr MaxMan has helped millions of clients worldwide.

What You Can Expect?

- First month: you will not only notice and increase in penis length, but also an increase in ejaculation, length of partner's orgasm, and penetrating sex.
- Second month: the penis will increase by 1 inch, and the girth (width) of the penis will be increased to 5%.
- Third/Forth month: you will notice an increase in penis size of up to 3 inches, plus an increase in Girth (Width) of 10%, plus a longer first month.
- Fifth/Sixth month: the full increase of 4 inches will be in effect as well as the girth (width) will increase to 20%.

FACT: In a recent survey by Vogue Magazine, 67% of all women admitted that they are unhappy with their partner's penis size. It's a matter of fact. An overall larger penis stimulates more nerve endings which means more of a satisfying sexual experience for you and your partner.
