ok,, the drawings are terrific.. we need tie down cleats for the jet ski portals, the steps to the floating from the fixxed should be on wheels , as the dolck will move up and down. the steps to the water need to be almost but not quite vertical with hadnrials with holes in them. thanks.. and we should bolt places for umbrellas to be locked in the floor , without proivding a place to trip on.

Jeffery,
Attached a number of concept drawings based on your direction for the LSJ dock.
Are we on the right path, or are you wanting something else?

Brice
