Subject: profit

Jeffrey,
Nick told me that his profit on the projector alone was \$6,200
his price to us was \$58,500 and he paid \$52,300 for the DPI,
according to his last email, I interpret as Nick upgrading to the 3D projector at his cost with no profit to him,
I would like to speak to DPI tech's and find out if the 3D projector displays a better screen since its using a 3D
lens capable, which according to Dawn, should be a better picture, since its a higher technology lens,.not sure if
that is true, but makes sense to me,,I think you and I agreed that the 3D projector was a brighter sharper
display, just my opinion,
thanks
Larry
