Subject: Maintenance Dates for the GIIB and the 727

Larry,

Please ensure that Jeffrey receives these dates that he requested. I am not sure that I have his latest e-mail address.

N909JE GIIB Drop Dead Date 3/31/11 for Cockpit Substructure Inspection and 24month items. **Downtime 7 to 10 days** dependent on insulation package. Midcoast STL, or Pentastar MI.

N908JE B727 Drop Dead Date 4/28/11 for Aircraft Reweigh, Elevator Quadrant AD, Fuselage Lapjoint AD, and 5C Inspection. **Downtime 2 to 3 weeks** dependent on findings. Timco Lake City, or Stambuagh at Brunswick Ga. (note: the interior items discussed today can be complied with during this period).

Please let me know if you have any questions. The "5C" check package is being built now. I will send it to each facility for review.

Best Regards,
Larry M.
