**Subject:** Props midnight express -

Jeffrey,

please confirm prop order for Midnight Express:

currently the props on Midnight are 15 1/2 x 22 degree pitch four bladed Bravo I props

plan to purchase 15 1/4 x 17 degree three bladed props \$598.33 each,.

The difference you may notice, 17 degree prop will give higher top speed, the current 22 degree four bladed prop gets the boat "out of the whole" better, gets on Plain faster, the three blade prop may cause bow to raise before boat gets to plain. If you noticed the boat with its currents props jumps onto plain very fast with minimal bow rise,.

pls confirm to order three blade props with 17 degree pitch, all parts for Midnight Express repair will arrive fedex in West Palm beach tomorrow, Wednesday, if you desire Marc to return to LSJ this week, I can have him bring the following items:

- Midnight express power steering leak, changing engine mount bracket, and install new power steering unit.
- new props for midnight
- New radio for Midnight, water damage to current one installed.
- sliding shelves for cabana pool area stereo equipment.

thank you,  
Larry
