Hello Richard,

We are trying to have the mechanic to stop out here today to look into changing the fan to a slower speed to reduce the noise.

Thank you

**Maria Klushina**

Hi Maria I reported the main passenger car exhaust fan problem which has a switch for two speeds and only runs at one speed, high its very fast and noisy. An otis mechanic came with a different fan but was not able to install being it was not the proper unit for the elevator. Can you please follow up with the route mechanic and if he has found a quiet slow speed I need to get this working as fast as possible.  
Thanks Richard Barnett
