Subject: APU loose wire, good start

Jeffrey,

We temporarily secured the wire going to surge valve, and started the APU, it was a smooth perfect start,. absolutely noticeable difference,.no shuttering, we have to change the cannon plug however, since the securing pin in the cannon plug was not able to be removed, Gulfstream is checking stock, if not, a local supplier will have a new cannon plug it in the morning,.easy access, and install I will let you know when we should be ready to depart,.

thank you,
Larry
