Subject: Sixth Floor Projector

We have heard back from the AV company that came to look at the sony projector. Repair Estimates are ranging from \$1000 - 1700 based on common points of failure being the power supply and mother board of the unit. They strongly recommend upgrading to a new projector at this time.

They are prepared to provide Quotes on 2D and a 3D projector Systems from Digital Projection that were in the 25K RANGE.

My ?s are

-Do you want the sony repaired even if it costs up too \$1700?

-Do you want to get quotes on Upgrading to a new projector system?

-2D vs 3D?

-and what price range of projector are you looking at ? The 25k was based on the value of the sony at time of purchase.

If you want to meet or speak with the rep directly?
