Subject: Air France tickets

Amex phoned me and said that when they booked the tickets for you and [REDACTED] they didnt realize that [REDACTED] credit card which I booked it on is actually under your account. Because you are the traveller they said if we cancel it on [REDACTED] card and put it on yours it will be \$16000 for both of the airline tickets instead of \$ 14000 for each. THis is a special on Air France called companion travel where a couple can travel for the price of one ticket and just the taxes of the other ticket. If the traveller is the card holder

The ticket and accommodation would still all be fully refundable.

I confirmed that I would be able to make this change without having to get you involved.

[REDACTED] appointment is on Wednesday so if we do make the change we would still have time to print out the new tickets for her.
