Subject: Re: Proteomics and cancer

I may come by for a day, since I am still on the organizing committee, but I am mostly going to watch at my home in simulcast with friends who can't afford the ticket (many of them ex-ted speakers). I am not a big fan of the Long Beach setup. You should try EG. It is more like the old TED.
-Danny

thanks are you going to ted

Jeffrey,

Last time we talked, I mentioned that I have been working on proteomics and cancer. I have been making progress. Here is a link to my recent TEDMED talk. If you want to look at something shorter, but less technical, the second link is a 5-minute video that Jesse Dylan made about what we are doing.
