Subject: LSJ INFO REPORT 2

-network support delay Jermaine has a flat tire on the side on the road to FTC called ftc (phones still up, network down) alerted staff to make mr casey informed and to help jermaine if needed.

-I strongly advise we get **back up internet for all locations** at least an iphone4 tethered to a macbook air (reason for macbook air is it has the longest battery life of any apple note book on the market) the theme for this whole trip has been **iphone 4 is the most reliable network on this island** so the locations and companies need this solution in operation to offset network downtime **FTC and LSJ I advise this as a solution now** to bridge the gap between old and new network design concepts which it seems to me are inevitable at this point

- in the **states** where **verizon 4 g** has coverage that would be my current tested best in class **service for mobile broadband and internet back up** .
