Mr Epstein I called in Cutting Edge to check the Gym System after you purchased the yoga room speakers because of only one side of the yoga room speakers worked. Jeff Sternhell of Cutting Edge meet with you that day briefly in the Dinning Room and informed you the Gym system was antiquated and a total mess and he would come up with a proposal to upgrade the Gym system . He returned on two occasions to trouble shoot the existing gym room system to keep it working and found the krell amp blown for the yoga room, Jeff sent it back to krell for repair which we are waiting for its return. Cutting Edge has spent at least 5 to 6 hours doing diagnostic work causing the wires to be a more of a mess than they were before which they say will need to be re wired to find the buzz that you hear when no music is playing .The I pad being dead Scott Dennett reported the chargers were removed from the Gym Room and was going to ask [REDACTED] to purchase new ones you think he would have charged it him self. At this time I would like to find a audio company that is more proactive.
