Subject: Re:

i spoke with Gary this morning and he told me the following:

- a) the copper he was referring to was copper that was originally laid that was pulled out when they reran wires to extend existing (bdrms 1,2,3&4) and new locations (generator)
- b) copper wire was stored in container in the far left of the woodshop when Gary was terminated - he believes it should still be there if it was not moved off LSJ
- c) there was also insulated copper wire strapped down on a pallet outside the marina office (gary is unsure if this was sold or used)

Other things Gary mentioned is that if you spoke directly with John Wernz and asked him if he worked on Arran boat during work hours he would provide you with info

Gary also believes that Casey and Carlos will not volunteer information but if asked questions they will provide you with useful information
