Subject: Napa fuel

Napa to St. Thomas is 7+14 (+1 kt tail wind), longest we've been in the air was 7+05min going into Paris and landed with just enough fuel,. anything over 7+00 hours is beyond range,. I will check winds closer to departure date,

runway length is OK for Napa to St. Thomas, with temperature up to 85 degrees,. which is fine, its been 55 degrees low, and high of 83 degrees,.
