Subject: LSJ Update

Jeffrey,

It was nice talking with you today.

Major changes for the Pool/Living Room area in our discussion are:

- 1) We have eliminated the Mezzanine/Balcony level at +48'.
- 2) We will study some options for the exterior stair at the northwest corner which is now going from +57' down to +38'.
- 3) We are going with the Option B Pool shape, which mimics the pool at the Ritz in Paris. (Photos you sent us)
- 4) There will be two sets of doors symmetrically placed on the north elevation.
- 5) Same sets of doors at the south wall.
- 6) We will study placing the Shower at the southeast corner with a possible view to the east
(This may impact the location and access to the Pool Mechanical space.)
- 7) At the +59' level, we will come up with some ideas of what to do with the 20' deck off of the living room.

We should have some ideas out to you at the beginning of next week.

Meanwhile, we would like to start some design sketches on the spa and the Flagpole pool based

on our meeting with you on the Island a few weeks ago.

Let us know if this works for you and thanks,

Tom
