Subject: my start up and some advice

hey,
hope all is well. we are close to having a prototype of our software. i think the potential here may be huge. would be keen to get your advice on the start-up, including some specific thoughts on

- 1- people you may know who could help on marketing side of things
- 2- possible board members
- 3- angels/vcs..

any good times to talk this coming week?

best,

Marc
