When would you like me to organize Scott to do [REDACTED] Ipad. I checked last night she has an old Macbook pro which used to be an office one that she is using in her apartment. Maybe Scott can set it up from that?

Apparently the wifi in 4m (Where [REDACTED] is staying) is slow so maybe he could take a look at it at the same time.

Not sure what the arrangement is with Scott so didnt want to organize without checking with you first.
