Subject: airborne Internet

Jeffrey,

I may have just missed the SATCOM Direct convention in Las Vegas, ends tomorrow, all the vendors are present, it's March 1st-3rd, I was just told about this,

I met with Gulfstream Avionics sales today reference Internet options,

The fastest is GoGo, AirCell system which is continental US coverage only, since it uses ground based reception, it is fastest service,

-BBML by Rockwell Collins (Broad Band Multi Link, is the most popular that Gulfstream is offering on G550's etc, coverage is through Satellite, and is world wide for the most part, this is not an option for GII since STC is required and not cost effective, Gulfstream has STC for GIV's and up, plus, this system is expensive: depending on SATPHONE installed and antenna, the best case scenario is \$260,000 to as much as \$700,000 (of course these are Gulfstream prices!!)

I will keep researching this

thx

Larry
