## **av salon**

just give me a heads up and I will arrange a closed store personal tour for you at av salon... I made sure they have that led zep song you like to demo the amps and speakers with plus the have a 3d tv and runko projector room

the store closes at 6 and I would have jim coleman there to give you a private showing and I would assist

-----

**HBRK** this week there is very important ( first week with citrix off )

**Zorro** I would like to go and just set up everything you have now, mac server, airports, cell 3g booster ( if you would give me time to visit a friend in AZ close to there I would be very grateful )

**LSJ / FTC** network over-hall of what you have, and we need to get iphones for back up internet, and ( hopefully ) netflix which worked very well for me in st thomas will work for you on lsj

( I want your next visit there to go as good as possible so you'll decide how that works best for you ) One thing we have yet to do is create a stereo paris with the sonos speaker system .... the major advantage is we can move the speakers at will anywhere you want and the sonos has provin itself very good. this may be good for many locations.

**71 st** i very much would like to get 2 more zone players and see if we can get more control out of club54 ..... I would like to go thru the house and map out what is live what is not and I think we can do allot of the work in-house

## **PARIS**

the wireless HDMI and the band and O tv concern me .... I showed you that B and O tv for the kitchen at lsj you said no ( that may not apply to paris but i did show a picture of what they are speaking about )

**Dear Mr Epstein, below from sarah k for reference**

You will find our proposal and documentation after a deep research to upgrade your system with old existing cables.

First proposal DE02833 includes Home Theater + Master Bedroom + Music distribution.

#### **Home theatre**

We have looked all the existing brands of projector in the world and no high end projector can fit in the existing lift. The best solution we found is a projectiondesign projector It is good, High definition, HDMI. If we want better, it is bigger. We'll connect Wireless HDMI on it, since there is no cables.

We could have better projector, but you need to change the lift, which is big work to do.

Everything will be controlled with your ipad.

We have included a great screen, that increases contrast and luminosity, even daytime. It may be usefull because the projector is not very powerfull. It is more expensive than a regular screen. At the end of this proposal, there is an option for a regular screen (5000 € less)

#### **Master Bedroom**

As you asked, we've proposed a B&O screen with bluray included. The biggest model is 55", if you want bigger we'll lose the bluray, and we'll use Wireless HDMI.

We replace the crestron by your ipad, and keep the existing speakers.

#### **Music System Sonos.**

We have one sonos player per existing audio zone + remote control. Sonos can also be controlled by any iphone/ipad

#### **Second proposal DE02840 is for guest bedrooms.**

In order to prevent running cables, we have proposed B&O screens with bluray included ( 40 inches)

If it doesn't fit your budget, we can propose Panasonic Screen with running cables or HDMI wireless.

Please don't hesitate to contact me if you have any question, or if you need any change on the proposals.

Best regards

Philippe

**I would very much like to speak with you on these things when you have time**

**thank you**

Scott
