**Subject:** fiber to Info center, Directional antana to 5 palms, to Kit house.

Brice,

Jermaine and I put our heads together and came up with this. If we do the fiber run from Flag Pole pool to the Info Center we would be able to use the Directional Antana to connect to 5 Plams and then from there to Kite House with another Directional Antana. We have the antana on island now, and we already have the conduit in place and the Fiber on hand to do the run from the Pool to the Info Center. This could save \$770.00 in 2" conduit, \$2,940.00 in labor from Glidden and another \$916.00 in Fiber cost. This would save \$4,326.00

The draw back is you would not be able to have voice over IP phones in 5 Palms or the Kite House, you would have to use a cell phone. Anyway its just a thought before we order conduit.

Gary
