Yes, you can apply for ' self fueling ', however, the person dispensing the fuel MUST have adequate training. When and if you will be doing it, we can provide you with the minimum standards.

Can we do this now, prior to building the hangar? Michael Hancock is price gouging. We would like to start on this right away.

Good afternoon Kenn,

Thomas World Air, LLC would like to add a request to our application to include a personal fuel farm next to the hangar it builds (if approved). This way TWALLC can purchase fuel directly for its own use. Let me know if this is possible and what needs to be done to get the ball rolling.

Merry Christmas to you, Judith and your entire family.

With warm regards,

Cecile
