Subject: Biochemist - Autophagy

Jeffrey, are you familiar with 'autophagy'? Basically cell cleaning to get rid of 'poop' (easiest way I can think of to describe it). Apparently, rapamycin (sirolimus) has been shown to slow aging and solve neuro-degenerative disorders in mice and fruit flies. My friend is in town this weekend if you have any interest in meeting to hear his research theory (he's still working on the paper).

<http://en.wikipedia.org/wiki/Autophagy>

<http://en.wikipedia.org/wiki/Sirolimus>

Trying to figure out a way to make money from it - Pfizer holds the patent on Rapamune which is only approved for kidney transplants. Apparently, the scientists doing the research are so convinced it works they are taking in small doses.

Hi Jeffrey,
Am in NYC and have started working ---
THANK YOU again for recommending me!!!
Really appreciate it, and think this is going to work out perfectly.

Can you recommend a masseuse that can do minor physical therapy
(just body alignment/adjustment)?

Love to stop by and visit when you are back in town!!!

Best, [REDACTED]
