> Read this tomorrow.

On the computer > Applications/Messages > Preferences > Accounts, make sure your iMessage account is signed in with your iCloud credentials.

Then.

On the iPhone > Settings > Messages > make sure iMessage is on then go into text message forwarding and select all the computers.

> Hello There James...quick question for you re texts...I have been able to text from my computer just fine, and now all of a sudden it is not working...I went to settings on my phone but I really don't know what to do... :)

something you could walk me through?

Don't answer me today!! ..tomorrow or this week is just fine! enjoy your sunday :)
