oh....and I see a cable connecting the printer
to my computer which leads me to believe I
am still hard wired in....right?

I don't think you are hardwired
anymore, and scanning should

definitely be working. I'll need to look at it when I am back.
As for other people connecting, they should try removing and re-adding the printer on their machines. I changed the printer setup when I upgraded your iMac a couple months ago and if they're connected to the previous method, it may not work with the current one.

Hi James ...next time you are at 71st, we need you to have a look at the printer...It is not scanning...also, no one can print from the printer wirelessly...I am the only one who can print because I am hard wire in (at least I think that is why)

Thanks! Lesley
