[REDACTED] sorry, I was tracking down specifics on Jeffrey's sample. The update is we already have some good quality exome data on some YPO participants. None has been completely analyzed and returned yet though.

Jeffrey's specific saliva sample had some issues (as did a few others). So, a repeat DNA extraction will be done and we should have his sequence data in about 2 weeks.

This is essentially the update but I'm happy to speak with Jeffrey by phone too later tonight or tomorrow if he wants to discuss more. I'm also collecting personal and family medical histories that make the genetic analyses more accurate and personalized so we can do that on the call. (It's completely voluntary to provide this info though.)

Thanks,
Joe

Good morning Joe...Jeffrey would like to speak with you today...is there a time you would be free and more available to have a conversation?

Please let me know.

Thank you,
