OMG! I can not figure out my user name and password on my computer at home...I am assuming it is the same on all my computers..but it usually defaults to my "user name" It is not doing that right now and I don't know what it is...I have tried email address..my names...but something is amiss...I need to "restart" my computer so the new version of adobe will work...I can't view things...

Anyway...whenever you have a second... can you let me know my info?

:) Lesley
