excellent! I think I actually get what you are talking about on the array of cards..
so happy to hear you always think he works hard. He gives me such grief when its time to do
math!~ We have tried to keep up with it as best as possible this summer so he will be better
prepared. I love the IXL website and [REDACTED] worked on it today...

For sure we want you continue to come and hope we can get you in twice a month still. I know
[REDACTED] has football practice on Tues, Thurs and Fri for the next months...so if we could look at
Monday's or Wed's that would work!

Hi [REDACTED]

[REDACTED] did great! We worked a lot with multiplication and division fact families. We
also worked on array cards and worked on making our own. For example, 20 can
be divided by different numbers (20, 10, 5,4,2,1) and will make different looking
array cards (look like grids- 2 rows of 10, 5 rows of 4).

I can leave you one to show you, I'm sure it's confusing!

I feel like I say this all of the time but he is such a hard worker and continues to
grow.

I know I have been with [REDACTED] for so many years after [REDACTED]. I would love to work
with him forever! I do know that he is so busy with sports and just wanted to
touch base about what you were thinking for next year.
