Before anything gets done these doors need to be cleaned. There is a good possibility that the residue is making the doors look dull. I'll have my painter take a look at them and price out what another coat of poly will be.

I didn't clean it with anything. From the looks of it, it will need another coat. Remember you coated it. Talk to the painter and get back to me.

Bob, That seems to be some type of residue on the doors. I showed it to the house sitter and she said same thing. I told them if they want another coat of poly I'll talk to the painter.

They used a harsh chemical to clean the doors that took the luster out of the stain.
