yes, actually you are right. Donald does do that stuff...his number:

If you could go the Tax Assessor's office above Walter Stuarts and tell them you are applying for the special permit and need to advise our neighbors within a 100 ft circumference of our house, they will give you the names and addressees of who all we need to alert via certified mail. I will leave you a complete set of documents that I picked up on Friday in the kitchen...take a look...I am not sure what all we need/don't need.

I have certified mail forms at my office and can bring home. you will need to leave the names/addresses for me so I can write everything up and go to the post office on Wed. Or you can scan and email them to me...

I am hoping Steven gets back to me on where we are with the final survey review...we need to get going...We want to be moving in to the house in 4 weeks. time goes quick..

Doesn't Donald do stuff like that also. He can spackle and do touch ups and hang the shutters and put on some hardware so the shutters stay in place? I will talk with him.

What about the delivery to the town. What do you need me to do?

I will also need a reasonable guy for some carpentry stuff. You should make him your man.
