All seeding is weather dependent .Right now the window for seeding is good for both hydro / grass seed & hay.
Proper preparation is the most important factor (grading topsoil depth water).
I have calls into a few people I work with.
Have your builder call me I would be happy to assist
Mike

Hi Mike. Question for you .. Do you hydro seed? If so Could you give me a quote for this? Bob has graded and removed rocks ... Just curious on cost to have done. Do you think we would see a lawn soon if we hydro seed vs regular seed? Thanks, [REDACTED]
