It is some sort of pear. They grow real tall. Most small flowering trees are weeping and grow slowly.

Drain is at my house. I did not have a chance to bring over last night [REDACTED]

Anyway, not even sure you have a plumber but if you need the drain I have in box and told Gloryana you may need to come by for it. Just let me know. I can have her leave on front porch for you if you want

When did you schedule the basketball hoop delivery for? Just curious?

I am thinking it is not a dogwood I like it is the tree with white blooms that are all going nuts right now!? What is that? Can we get a small one of those for front yard. I see them all over NC. What is this tree???
