Ok, we should make them the same size so you can do what you want with them.

Subject: My office file cabinets should change spot

Hey bob. After more consideration, I think the 4 drawers of file cabinets should be the drawers on the left side of wall (if you are looking at the window, the file drawers to left). The regular drawers should be behind me when I'm sitting at my desk (if you are looking at the window to the right hand side of window)
ok :)
