Yes borescope of engines would be good,. I think it's best to let Rolls Royce review Gulfstream's sound survey, since corporate care needs to approve a borescope.,
I've been told survey report should be available Thru or Fri next week

Gulfstream was able to secure the right hand floating flight spoiler and reduce the height of both inboard spoilers to half its original height,, if we are on right track, buffet should be reduced.,

Should be ready to fly by 2pm today to Teterboro.,
