Subject: Gulfstream Wood Veneer

Larry,

I want to help Jeffrey and make sure that Gulfstream is matching the "hardwood" edging to the selected wood veneer perfectly. Left to their own, the idiots will likely show you guys a lighter wood (Maple, Sycamore, etc.) with a "similar" grain pattern that they will "try" and stain to match the veneer "as best as reasonably possible".

We sent Jeffrey the sample of Goodrich, Quartered Silver Birch composite veneer (IJI170-18-2).

What have they proposed to you for all of the hardwood in the aircraft (Ledges, credenza, tables, door jambs, etc)?

</=pan>

Please let me know so that I can email you what I am confident Jeffrey will want as opposed to the potential of going round and round with their design department.

Best Regards,

Eric
