Subject: LSJ/GSJ status

Good day R=ch

LSJ/GSJ is without phone and internet as the current moment ViYA link via fiber have been destroyed due to the majority pole being snapped along the road to cabrita point. The dragonwave radios are offline the need to be evaluated and realigned I also heard from an outside contractor working with viya that a second tower that feeds the tower that our stt dragonwave are mounted needs to be repairs.

</=pan>

I found the storm destroy the radio that help feed data and phone to the lsj tower so that the dragonwave can send it to GSJ was destroyed along with the Cisco 48 port 3560G switch for the GSJ main complex.

I have reach out to Earl, Hector, and Alyster and have been assured that as soon as they can make sure their side is stable they will try to restore service. Earl states he will get to us as soon as they can and will schedule us along with ritz and the banks in red hook.

In addition, I will see if there are any hotspot at att for the boss visit.

May I send a list of items that I need for stc lsj and GSJ tomorrow (I am waiting on specs from Earl of VIYA)

Respectfully submitted  
Juan
