Attachments: Blue bitch.JPG; Asphalt Sketch.pdf

Good Day,

Attached you'll find a proposed diagram for the edges, top, and bottom finish for asphalt at the side of hill.

Proposal:

Sides of Edges - Compact top soil 1/2in below Asphalt and hydro seed

Crest of hill - Hand excavate 3 inches deep and then place 7 feet of blue bitch rock set in concrete which will act as a landing pad for the bikes. Curve or straight edge.

Bottom of hill - Excavate 3 inches deep and then place blue bitch rock set in concrete creating a radius for easy vehicle maneuvering.

Please Advise.
